### A First Look at 2024-25 FAFSA Race and Ethnicity Data

#### Brent Evans and Julia Turner

#### Introduction

The FAFSA Simplification Act (2020) required that anyone who completes a FAFSA form answer questions on their race/ethnicity. In the 2023-24 FAFSA cycle, the Department pilot tested this collection. It was fully implemented in 2024-25. The data collected represent one of the largest and most detailed datasets of race and ethnicity data currently in existence across the federal government. The FAFSA form asks respondents to select one or more among six racial and ethnic identities (American Indian or Alaska Native; Asian; Black or African American; Hispanic, Latino or Spanish; Native Hawaiian or Other Pacific Islander; and/or White). Within each major category (excepting American Indian or Alaska Native), one or more subcategories can be chosen, and an "other" write-in option is available as a subcategory for all six major categories. The form also offers students a "Prefer not to answer" option, but less than 5% of FAFSA filers declined to identify their race or ethnicity.

These data can help policymakers and researchers better understand the application for and take-up of Title IV aid programs. In this report, we provide a first look at the racial and ethnic characteristics of everyone who filed a FAFSA in the 2024-25 FAFSA cycle through October 31, 2024.<sup>3</sup> It provides reporting frequencies of each of the six major race and ethnicity categories, separately by Pell eligibility and for all FAFSA filers and the subset of first-time FAFSA filers who would be first-time college attendees that recently graduated from high school ("first-time recent high school graduates").<sup>4</sup> The report also provides frequencies of race and ethnicity subgroups for the five major race and ethnicity categories for which the FAFSA provides preset subgroup options.<sup>5</sup>

The reporting of race and ethnicity data can be complex, especially when such detailed data is gathered across millions of individuals. In this report, we list the number of respondents who selected that racial or ethnic identity "alone" (i.e., it was the only selection made), "in combination" (i.e., it was chosen along with additional selections), and "alone or in combination" (i.e., the sum of "alone" and "in combination"). We believe this approach provides substantial detail on the number of FAFSA filers who select multiple race and ethnicity categories without listing all possible combinations of choices of major categories (of which

<sup>2</sup> Providing a response or selecting "Prefer not to answer" was required for all online FAFSA filers; they could not skip either the ethnicity or race question. Filers who submitted the paper FAFSA could leave the race and ethnicity questions blank, and their answers would subsequently be coded as "prefer not to respond." We estimate that this would have affected, at most, fewer than 1,500 submissions or less than 0.01% of the sample.

<sup>&</sup>lt;sup>1</sup> The relevant FAFSA questions are presented in the Appendix.

<sup>&</sup>lt;sup>3</sup> The complete 2024-25 FAFSA cycle ends June 30, 2025, so these data represent only a portion of the total number of FAFSA filers expected during the cycle. Future analyses that can be conducted once the cycle ends may reveal important differences in the timing of when particular groups submit FAFSA forms.

<sup>&</sup>lt;sup>4</sup> We define "first-time recent high school graduates" by limiting the sample to filers under age 20 who expect to be a first-year student in college and have a high school diploma.

<sup>&</sup>lt;sup>5</sup> Preset subgroup options are available for all of the major categories except American Indian or Alaskan Native. For this category, only a write-in subgroup option is available.

<sup>&</sup>lt;sup>6</sup> In response to OMB SPD 15, reporting race and ethnicity data will change across the federal government in the coming years. This report uses an extended version of OMB SPD 15 Approach 1 to report race and ethnicity identities.

there are 64). We note that respondents will be counted multiple times using this approach when selecting more than one race or ethnicity.<sup>7</sup>

Although Hispanic ethnicity was queried separately from race on the FAFSA, we treat it as a major category and report it along with the other major race categories. When reporting on subcategories of the major categories, we report the write-in "other" option as a separate subcategory in this report, although we acknowledge that overlooks substantial differences in identities within that group and leave analyzing such data—via manual processing of free-text entries—to future work.

### Major Race and Ethnicity Categories of FAFSA Filers by Pell Grant Eligibility

In Table 1, we report the number of FAFSA filers by Pell Grant eligibility for each of the six major race and ethnicity categories on the 2024-25 FAFSA. As described above, the number of filers who chose only that race or ethnicity is listed in the "alone" row. The "in combination" row lists the number of filers who chose that race or ethnicity along with at least one other. For example, if a respondent chose both Hispanic and White, that person would be listed in the Hispanic "in combination" group and the White "in combination" group. The "alone or in combination" row reports the sum of the first two and reflects everyone who selected that race or ethnicity.

As seen with the "in combination" numbers, a sizable portion of FAFSA filers select multiple race and ethnicity identities. Across the full population, about 19% choose more than one major category, with Hispanic and White comprising over 60% of that group, which is reflected in the large portion of "in combination" among Hispanic filers. In contrast, Black or African American respondents are more likely to only select one racial category. We provide a list of the most commonly selected combinations of major race and ethnicity categories in Appendix Table 1.

For every group, there are more Pell eligible filers than not Pell eligible; however, there is wide variation in the percentage of Pell eligible filers across race and ethnicity. For example, Pell eligible Black or African American filers outnumber non-Pell eligible Black filers nearly four to one. In contrast, Asian filers are more evenly divided between Pell and not Pell eligible.

3

<sup>&</sup>lt;sup>7</sup> Future work that makes full use of detailed race and ethnicity data, with a particular eye towards the racial subgroup data, should be encouraged. The level of detail the FAFSA provides in the collection of data on race and ethnicity is rare, and researchers and policymakers should take full advantage of understanding the complexity of the multiple racial and ethnic identities FAFSA filers have.

<sup>&</sup>lt;sup>8</sup> Treating ethnicity in this manner aligns with the guidance provided by OMB SPD 15.

Table 1. Race and Ethnicity by Pell Eligibility: All FAFSA Filers

|                                   | Pell Eligible | Not Pell Eligible |  |
|-----------------------------------|---------------|-------------------|--|
|                                   | (1)           | (2)               |  |
| American Indian or Alaskan Native |               |                   |  |
| Alone                             | 81,241        | 25,559            |  |
| In Combination                    | 226,202       | 91,940            |  |
| Alone or in Combination           | 307,443       | 117,499           |  |
| Asian                             |               |                   |  |
| Alone                             | 592,815       | 368,305           |  |
| In Combination                    | 178,518       | 148,794           |  |
| Alone or in Combination           | 771,333       | 517,099           |  |
| Black or African American         |               |                   |  |
| Alone                             | 2,356,587     | 554,893           |  |
| In Combination                    | 503,563       | 160,341           |  |
| Alone or in Combination           | 2,860,150     | 715,233           |  |
| Hawaiian or Pacific Islander      |               |                   |  |
| Alone                             | 28,289        | 10,005            |  |
| In Combination                    | 49,615        | 25,059            |  |
| Alone or in Combination           | 77,904        | 35,064            |  |
| Hispanic or Latino                |               |                   |  |
| Alone                             | 1,197,020     | 328,852           |  |
| In Combination                    | 1,716,628     | 648,180           |  |
| Alone or in Combination           | 2,913,648     | 977,032           |  |
| White                             |               |                   |  |
| Alone                             | 3,523,355     | 2,782,165         |  |
| In Combination                    | 1,776,357     | 758,463           |  |
| Alone or in Combination           | 5,299,712     | 3,540,626         |  |
| Prefer Not to Answer              | 436,889       | 238,967           |  |
| Total                             | 10,360,079    | 5,189,172         |  |

**Notes**: All FAFSA filers for the 2024-25 school year through October 31, 2024 are used. Pell eligibility is calculated using SAI. A handful of observations have a missing SAI due to a rejected FAFSA still awaiting resubmission; those students are counted as not Pell eligible. Data come from Federal Student Aid. Total numbers reflect the full population of FAFSA filers by October 31, 2024. The sum of numbers across race and ethnicity does not equal the total because of multi-counting the filers who choose more than one race or ethnicity.

In Table 2, we replicate the analysis but limit the sample to only first-time recent high school graduates. The pattern across Pell and not Pell eligible shifts dramatically when focused on this subset of filers. American Indian or Alaskan Native, Hawaiian or Pacific Islander, and Hispanic or Latino students are fairly equally distributed across Pell eligible and not Pell eligible, a change from the full sample in which all three groups were much more likely to be Pell eligible. Larger

proportions of Asian and White first-time recent high school graduate filers are not Pell eligible than compared to the full population.

Table 2. Race and Ethnicity by Pell Eligibility: First-Time Recent High School Graduates

|                                   | Pell Eligible<br>(1) | Not Pell Eligible (2) |
|-----------------------------------|----------------------|-----------------------|
| American Indian or Alaskan Native | . ,                  | . ,                   |
| Alone                             | 6,942                | 5,803                 |
| In Combination                    | 22,167               | 24,284                |
| Alone or in Combination           | 29,109               | 30,087                |
| Asian                             |                      |                       |
| Alone                             | 54,418               | 105,699               |
| In Combination                    | 18,965               | 44,193                |
| Alone or in Combination           | 73,383               | 149,892               |
| Black or African American         |                      |                       |
| Alone                             | 179,821              | 123,301               |
| In Combination                    | 56,443               | 45,933                |
| Alone or in Combination           | 236,264              | 169,234               |
| Hawaiian or Pacific Islander      |                      |                       |
| Alone                             | 2,615                | 2,532                 |
| In Combination                    | 5,337                | 6,983                 |
| Alone or in Combination           | 7,952                | 9,515                 |
| Hispanic or Latino                |                      |                       |
| Alone                             | 158,292              | 109,831               |
| In Combination                    | 207,011              | 190,391               |
| Alone or in Combination           | 365,303              | 300,222               |
| White                             |                      |                       |
| Alone                             | 289,189              | 666,078               |
| In Combination                    | 210,263              | 222,357               |
| Alone or in Combination           | 499,452              | 888,435               |
| Prefer Not to Answer              | 26,187               | 48,937                |
| Total                             | 968,759              | 1,318,910             |

**Notes**: First time FAFSA filers under age 20 with a high school diploma in their first year of college are used to proxy for recently graduated high school seniors. Pell eligibility is calculated using SAI. A handful of observations have a missing SAI due to a rejected FAFSA still awaiting resubmission; those students are counted as not Pell eligible. Data come from Federal Student Aid. Total numbers reflect the full population of first time recent high school FAFSA filers by October 31, 2024. The sum of numbers across race and ethnicity does not equal the total because of multi-counting the filers who choose more than one race/ethnicity.

### **Subcategories of Major Race and Ethnicity Categories**

Five of the six major race and ethnicity categories on the 2024-25 FAFSA provide a set of optional subcategories of race and ethnicity. A respondent can choose one or more of the preset subcategories for any selected major race and ethnicity category. All six major categories provide an "other" option in which a filer can write in a free text response. In Table 3, we provide the number of FAFSA filers by subcategories for each of the five major race and ethnicity categories with preset subcategory response options.

Table 3. Subgroup Breakdowns: All FAFSA Filers

|                                 | Alone     | In Combination | Alone or in Combination |
|---------------------------------|-----------|----------------|-------------------------|

**Notes**: Anyone who selected one of these subgroups is included in the analysis. In combination refers only to those who selected two or more subgroups in the same major race category. Filers through October 31, 2024 are included. Data come from Federal Student Aid.

#### Conclusion

This report provides initial findings from one of the newest and most detailed race and ethnicity data collection efforts across the federal government. We provide a first look at how these data are collected and report the racial and ethnic identities of the full population of FAFSA filers by midway through the Fall 2024 term. Using an expanded approach to race and ethnicity reporting recommended by the Office of Management and Budget, we break out FAFSA filers by race and ethnic identity along two other dimensions: Pell eligibility status and first-time recent high school graduate. Taking advantage of the large sample size, this report provides detailed breakdowns by subgroups of the major race and ethnicity identities. Across all FAFSA filers, there is a high reporting rate for selecting at least one race or ethnicity: fewer than 5% of filers declined to identify their race or ethnicity. There is also a high take-up rate of identifying a subgroup within the major race and ethnicity categories. Additionally, the free text entry option to identify one's racial or ethnic subgroup provides an opportunity to use particularly rich new data to better understand racial and ethnic identities, although this report leaves that to future work. As this data collection persists into the future, these data can help explore how race and ethnicity in this population may change over time and across different dimensions such as geography and age. 9 We also expect these data to be linked to important outcomes like college enrollment and success in the future.

\_

<sup>&</sup>lt;sup>9</sup> In response to OMB SPD 15, the Department will change the collection of race and ethnicity data for the 2026-27 FAFSA cycle to align with the new requirements including combining the race and ethnicity questions and adding a Middle Eastern and North African major race category.

## Appendix

## Appendix Figure 1. 2024-25 FAFSA Race and Ethnicity Questions

| - <b>12</b> Student Race and Ethnicity  ——  |  |
|---|--|
| The answers will not affect the student's eligibility for federal student aid, be used in any | y calculations, or be shared with the schools to which the student applies |
| They will be used for research purposes only.   |  |
| Is the student of Hispanic, Latino, or Spanish origin? Select all that ap                     |  |
| No, not of Hispanic, Yes, Mexican, Yes, Puerto Rican  |  |
| Latino, or Spanish Mexican American, origin or Chicano  | Hispanic, Latino, to answer or Spanish origin                              |
| What is the student's race? Select all that apply. If you select "Other" and enter n          | more than one category in the entry boxes, skip a box between each one.    |
| White   |  |
| ☐ German ☐ Irish ☐ English [  | ☐ Italian ☐ Polish ☐ French  |
| Other:  |  |
| Enter Lebanese, Egyptian, Iranian, etc.   |  |
| ☐ Black or African American   |  |
| ☐ African American ☐ Jamaican ☐ Haitian [   | ☐ Nigerian ☐ Ethiopian ☐ Somali  |
| ☐ Other:  |  |
| Enter Ghanaian, South African, Barbadian, etc.  |  |
| ☐ Asian   |  |
| ☐ Chinese ☐ Filipino ☐ Asian Indian ☐   | ☐ Vietnamese ☐ Korean ☐ Japanese   |
| Other:  |  |
| Enter Pakistani, Cambodian, Hmong, etc.   |  |
| ☐ American Indian or Alaska Native  |  |
| Other:  |  |
| Enter name of enrolled or principal tribe(s) (Navajo, Blackfeet, Ma                           | ayan, Nome Eskimo Community, etc.)   |
| ■ Native Hawaiian or Other Pacific Islander   |  |
| ☐ Native Hawaiian ☐ Samoan ☐ Chamorro ☐   | ☐ Tongan ☐ Fijian ☐ Marshallese  |
| Other:  |  |
| Enter Palauan, Tahitian, Chuukese, etc.   |  |
